

## Photo Booth Set up guidelines

We can set up in many locations that you may think are inaccessible to large old style booths. We do have some requirements that we need to have met in order to maintain the quality of the photos and insure the equipment is not damaged. They include but may not be limited to the following:

1. Location of booth must be inside or under a tent to avoid too much sunlight degrading the photo quality.
2. We can not set up in an open field unless under a tent.
3. We can not set up in locations where the wind will blow dust, dirt etc on the equipment.
4. We can not carry equipment up stairways unless prior arrangements are made and extra delivery charges will apply. Our equipment is on wheels. Wheelchair ramps, elevators, single small step entry ways are fine. Multiple step entryways require special delivery arrangements.
5. We can wheel our equipment over firm surfaces but not loose gravel, dirt, mud, etc.
6. Equipment must be protected from rain, sleet, snow and any adverse weather elements.
7. We require approximately 8 by 10 min space within 50 feet of an electrical outlet that does not have any other items drawing from it.

This list may be updated at any time please contact our office if you have any location questions
